THE GREEN RIVER

The Green River flows for approximately 384 miles through south-central Kentucky, meandering through forests, limestone bluffs, and valleys before joining the Ohio River. Within Mammoth Cave National Park, the river plays a vital role in shaping the landscape, carving out our world-famous cave system beneath the surface. The river supports an incredibly diverse ecosystem, including more than 150 species of fish and 70 species of mussels—making it one of the most biodiverse rivers in the United States.
The surrounding wetlands and forests offer a home to various bird species, amphibians, and mammals. The Green River's clean, nutrient-rich waters are essential for maintaining this delicate balance, supporting life both in and out of the water.

Mammoth Blackberry Moonshine, Citrus Vodka, Lemon Juice, and Simple Syrup \$12.95

NOW SERVING: MAMMOTH CAVE KENTUCKY STRAIGHT BOURBON WHISKEY

First crafted in 1869, this historic wheated bourbon embodies the resilience and depth of its namesake, Mammoth Cave National Park. Once part of the W.L. Weller & Sons portfolio and sold as medicinal whiskey during Prohibition, it was a leading brand until disappearing in the 1960s. Now carefully revived by Balance Distilling, this bourbon offers rich, smooth flavors that invite exploration. Available exclusively at The Lodge at Mammoth Cave and Balance Distilling's tasting room.
